

History and Recent Condition -

By Shomit Sirohi

The mass level of the peasant class in India, which then has shifted to the axis of Maharashtra and Kerala which is also a complex organization of speech assemblies which then is also a common public assembly format in all regions of South and Maharashtra in fact which then is the working class in CITU, AITUC and AICTU organized which is also the structure of relative independence of the structures from in fact the vertical structure and culture of the leader which in one instance argues "Why is not with Poratam, and following Hegel and all that, when it is fine by us." Which then means that the recent fever illness and Christian unhealth attack in vertical culture which is in fact an attack which is real in the sense of vertical relations of Jewish and Christian Pope in fact towards Sirohi, is then a vertical gesture, which though is in fact a real health miracle and happiness and success in history which means the current today's crisis was in fact another vertical attack which though is freeing up in Sirohi, as in fact free praxis which means in the sense of Negri, a free praxis which means to be interested in freedoms more than oppressions even of daily free movements which means that is now active as free praxis has won - which is actually the level of vertical structure and

culture, having the determination in fact of the health crisis being won, as a structure which means a montage of people celebrating good health, which is also a cultural formation of the process, ill health, which is also the instance “Why can he not relax and live well the fever he thinks, it is because he is not following it well because of Christian unhealth reasons.” Which then means in fact daily talking was also around this, and so the cultural integration then has now Parsifal as the answer which has become a subject – which then means in fact Spirit, which also means he has won, the freedom according to all – it just attacks a person and then wins, which can also mean a rule for the next week, or month that in fact it clears up, the crisis by a process of phenomenology in Hegel’s sense which then is articulated to his behaviour and forms of speaking which then means – “free praxis” or freeing it up is how Negri is describing social protests but also individual process called a convolute which means – potential and actual movements of small sequences of what is called Nanny Bilesteri, which means a man who is a sequence like this. It means free praxis is just the man reflecting on his own health and happiness as achieved by now. The Christian unhealth process is actually in one instance said as “We are crazy in many senses” which is actually a condition the Pope is trying to tell Sirohi, which means in fact worst health crises and has in fact attacked Sirohi, which is a process of an ensemble which

practically and actually attacks a Prophetic person like Sirohi, which is in Hegel called “attacked by opposites and similars, a Brumiarean despotism.” Which means in the Philosophy of Right we are studying, sometimes the attack can be legal and actual in Christian solidarity, for the despotic Brumiare.
